

# OSTİM your factory

Since its establishment, OSTİM producing at all hands with the spirit of solidarity and co-operation, is not only a physical industrial zone nearly completing half a century, but it does verbalize determination of working and achievement for domestic and national industry that this spirit represents.

Thus, OSTİM experiencing the advantage of being closer to the public, universities, technoparks, research centers, national and international primary industries, non-governmental organizations and other related sectors both as the decision maker and needer authority as the first industrial zone of established in our country's capital city, institutionalizing cooperation networks it has established and make them sustainable.

This cooperation network OSTİM has created throughout its production life, while rapidly transforming our lives and production styles, in the present day what and how we did matters rather than where we are in the world forms a valuable asset for our regional producers and our country. Because, **companies in OSTİM not only take advantage of production/ service infrastructure and means owned by our region but also easily access to values and advantages ensured by this cooperation culture and also for many other opportunities required for production.** This ecosystem creates a fertile basis to enable innovative, open to cooperation and competitive enterprises to survive.

## If you also wish to have;

- Quality, rapid and low cost infrastructure service,
- To work with talented and experiences solution partners and expertized suppliers,
- To have expert support in the fields of education, consultancy, R&D, marketing, introduction, human sources,
- To get involved with developed cluster and cooperation networks in reference to your industry,
- To take advantage from OSTİM resources for many industries and business lines having a powerful equipment pool and talented man power,
- To closely chase innovations and development and to work in national strategic projects in your enterprise,

**Come to OSTİM. Because, OSTİM is just your factory.**

**For 50 years, this factory has been continuing to produce your needs at all hands for the region, country and all humanity.**

ORHAN AYDIN

OSTİM  
Chairman

**An Industrial city in its 50th anniversary** installed on **5 million square meters outdoors** in northeast of **Ankara**, the capital city of Turkey; **OSTİM Organized Industrial Zone**

## ABOUT ANKARA

### CAPITAL CITY OF TECHNOLOGICAL INVESTMENTS

- Ankara ranks in second row for development order in Turkey.
- It is Turkey's second largest city for production of Added Gross Value (GVA) by regions. Industrial sector constitutes 25.7% of this value.
- It ranks in second row for Turkey's advanced technology product manufacturing by provinces.
- Ankara exporting 6.591.461.470 dollars in 2017 and mostly exports to USA, China, Iraq, Germany and Italy.
- Machinery and equipment, chemicals and products, metal goods, basic metal industry and motor land vehicles lead the way to in the order of industries for highest amount of export.
- It takes the place near the top in Turkey for industries with advanced technologies such as machinery and equipment, defense, aerospace, medical, precision and optical instruments, high-tech sectors.
- **Capital City Ankara is the center of education, R&D, Manufacturing Development, innovation and qualified production with 12 organized industrial zones, 19 universities, 25 R&D centers currently active and 8 technoparks.**

## ABOUT OSTİM

### TO GLOBAL COMPETITION WITH COOPERATION AND COALITION

Celebrating its 50th anniversary as one of the pioneering industrial zones of the Ankara industry, OSTİM is an SME city with international brand value as a solution center for meeting the national needs in which more than 6,200 enterprises and more than 60,000 employees operate in 17 sectors and 139 business lines.

OSTİM laid its foundations by deceased Cevat Dünder and a group of entrepreneurs in 1967, in the present day jog peoples' memory the concept of "joint competition" and "coalition" in Turkey by expanding SMEs' ideals.

OSTİM strengthened the quality and low cost infrastructure, input and superstructure production ecosystem intended for the problems and needs of regional enterprises by taking OSB status in 1997. In OSTİM you can access every kind of investment, permit, infrastructure supply, etc., services "all in one step" which you need in production environment and supply in a fast and quality manner. You can take part in a safe and efficient production environment in this gigantic structure that demonstrates its differences with production facilities, public service units, living spaces, health, education and non-governmental organizations where life continues 7/24.

You can get support and cooperate in fields like training, consultancy, employment, guidance, R & D, technology transfer, marketing, promotion, etc., from specialized OSTİM institutions for your needs aimed at development of the enterprises.

Strategic sectors have been supported by various models in order to increase the competitiveness of the regional enterprises and development for production and design capacities enabled and specialization has been ensured especially for defense, aeronautics, rail systems, medical, construction equipment, communication technologies, energy, rubber technologies. Our enterprises with high design and production capabilities appended their signature to large volume projects using the infrastructure and equipment of many business lines in the region.

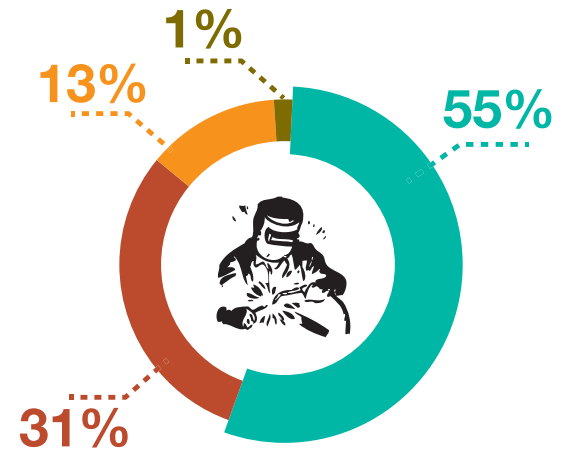

Clustering in these strategic sectors for 7 different headings in the region provide the opportunity to cooperate with the national production capabilities of the region, especially for the entire Ankara industry. The clusters becoming a focus of knowledge and experience within the sector over time provide the most efficient communication and interaction environment for the development of innovative products and projects.

OSTİM, an international example and inspiration with its production experience and ability, integrative, innovative and sustainable works continues to serve the competitiveness of the country's industry.

## ORGANIZED INDUSTRIAL REGION

### OUR VISION

To be a sustainable, global and pioneer industrial zone dominating Turkish industry with local/national/competitive solution as the first coming to minds for production and supply by rendering services beyond expectations.

### OUR MISSION

To be an industrial zone rendering quality, innovative and uninterrupted services in a sustainable manner, creating projects to make our members and our zone more competitive and contributing for the development of Turkish industry.

### OUR PURPOSE

- To improve infrastructure services with renewal and innovative services.
- To diversify member services in strategic sectors and to provide sustainable growth of members with innovative services through long term cooperation.
- To increase Turkish industry's competitive power with international cooperation and activities and innovative new products/services.
- Establishing ergonomic and safe working environments and ensuring the health, safety and security of all our employees and all persons interacting with our organization, within the framework of applicable legislation.
- In addition to harmonizing with environmental legislation, to prevent environmental pollution, to adopt and generalizing environmental awareness and to carry out necessary activities in energy efficiency issues.
- To increase our service quality in the frame of customer satisfaction oriented and continuous improvement understanding.

# OSTİM ORGANIZED INDUSTRIAL ZONE REGIONAL DIRECTORATE

OSTİM OSB holding office within the framework of Regulation on Organized Industrial Zones renders services to its members with “One Stop Office” insight. Offering powerful infrastructure cheap and quality energy facilities with a professional point of view for the enterprises in the region OSTİM OSB carrying out important projects with the aim of a competitive and sustainable industrial zone.

Continuing its activities as affiliated to Republic of Turkey Ministry of Science, Industry and Technology, OSTİM OSB, comprises 7 small sized industrial site cooperatives and joining of industrial structuring around these cooperatives.

OSTİM OSB has a visionary management model that advances towards quality and excellence with development inputs and infrastructure services as well as development and support services for superstructure and development initiatives developed with solution partners. Adopting the concepts of “quality, innovative, uninterrupted and sustainable” as a model in many countries of the world OSTİM OSB, continuously measures the quality of service.

OSTİM OSB is taking firm steps forward on the path of ‘becoming a sustainable, global and pioneering industrial region dominating Turkish industry with domestic/national/competitive solutions that first come to mind in production and supply by providing services beyond expectations’.

ANATOLIAN RAIL TRANSPORTATION SYSTEMS CLUSTER

## ANATOLIAN RAIL TRANSPORTATION SYSTEMS CLUSTER (ARUS)

Setting out with the idea of “Railway Systems are a National Matter”, the rail transportation systems manufacturers who believe that all the needs of rail transportation can be met domestically have come together with their supporting institutions and founded the first non-regional cluster which covers the whole Anatolia thus named Anatolian Rail Transportation Systems Cluster.

Manufacturing domestic and national brands of rail transportation systems from design to final product and becoming a global brand as primary goal, ARUS brings together sector industrialists from all over Anatolia by leading the Turkish railway systems sector and undertakes the task of cooperation, collaboration and national brands.

## OSTİM RUBBER TECHNOLOGIES CLUSTER

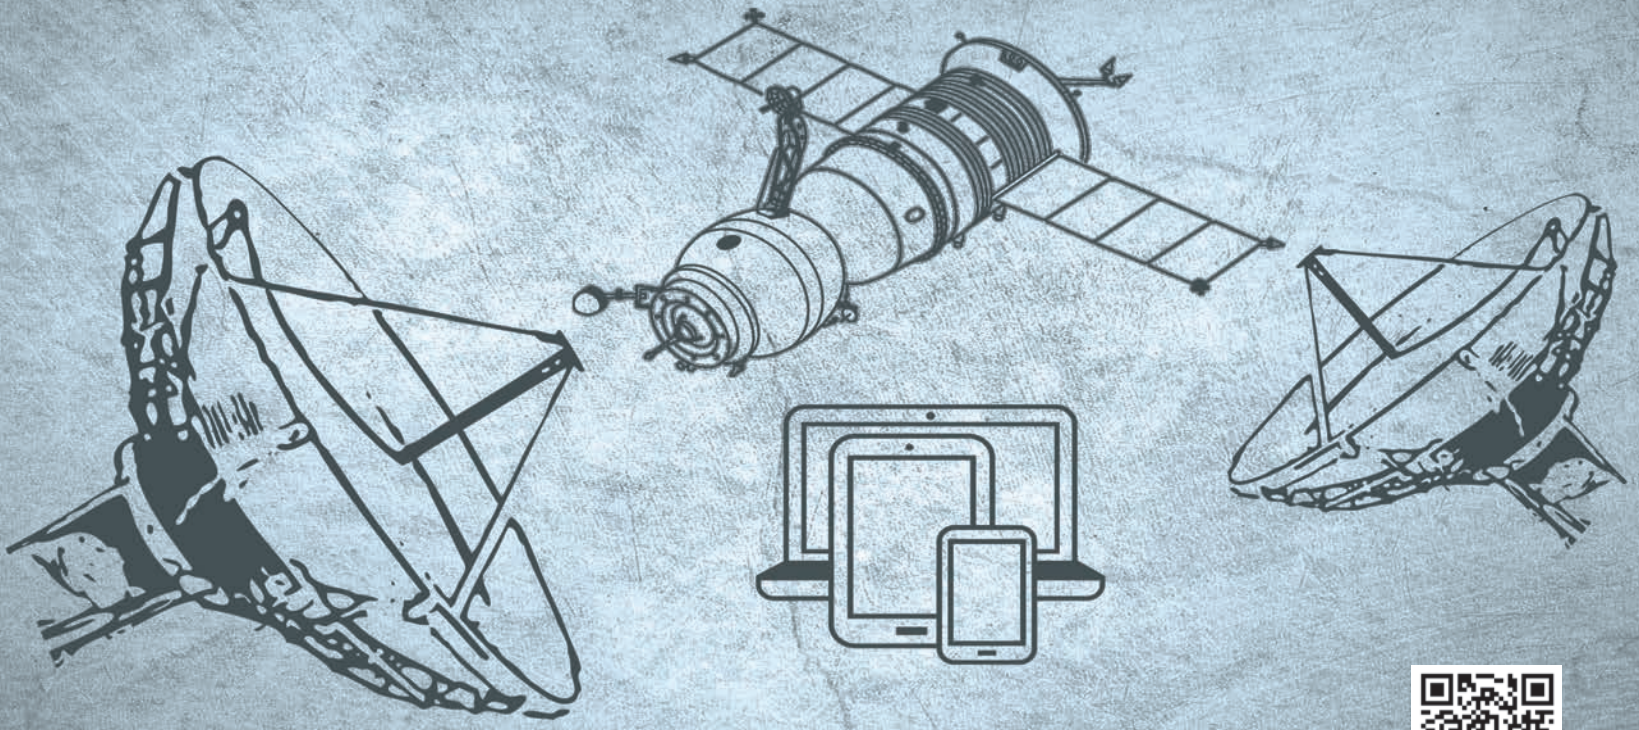

OSTİM Rubber Technologies Cluster consists of firms in the value chain of the rubber industry. Though being 100% dependent on imports of raw materials, the sector's proximity in export-import rates for products exhibits the fact that it is a competitive sector.

Main works have been undertaken since its establishment; the 1st URGE Project (2013-2016), the formation of The European Elastomer Polymer Partnership Initiative (2015) and Rubber Recycling Feasibility Project supported by Ankara Development Agency (2017). The 2nd URGE project, which will last until 2020, was started on June 2017 and supported by Ministry of Economy of Republic of Turkey.

Two of the 50 existing members are in Bursa, two in Sakarya, one in Istanbul and 45 in Ankara. Membership to the cluster for a company, aiming for competitiveness in the sector, can be obtained from every city of Anatolia, especially Ankara and surrounding provinces.
