

A Production Ecosystem **OSTİM: Your factory**

OSTİM, producing together with the spirit of solidarity and cooperation since its establishment, represents not only a physical industrial zone but also the determination to work and succeed for a competitive national industry and technology.

OSTİM, as the first industrial zone of Ankara the heart of our country as Capital, taking advantage of its closeness to the public, universities, techno park, research centers, national and international main industry, non-governmental organizations and other relevant sectors, institutionalizes and makes the cooperation networks sustainable it has established.

Now, what we do is more important than where we are in the world and our way of life and production are rapidly transforming, OSTİM builds an ecosystem creating economic value for our regional producers and our country. Because companies **with OSTİM easily reach various production supports not only from the production/service infrastructure and opportunities that our region has, but also the value and advantages provided by this cooperation culture and ecosystem.** This ecosystem creates a productive environment for innovative, collaborative and competitive businesses to live.

For your business;

- High quality, fast and low-cost infrastructure service,
- Businesses operating in many sectors and business lines with a strong machinery park and capable manpower,
- Capable, experienced solution partners and expert suppliers,
- Expert support in the fields of training, consultancy, R&D, marketing, export, promotion, human resources,
- Developed clusters, cooperation networks, national and international projects related to your sector,
- The university-industry cooperation, innovation, entrepreneurship, investment and financing ecosystem

Join the ecosystem of OSTİM.

OSTİM: Your factory

This factory continues to produce all together for its region, country and all humanity for more than 50 years.

Board

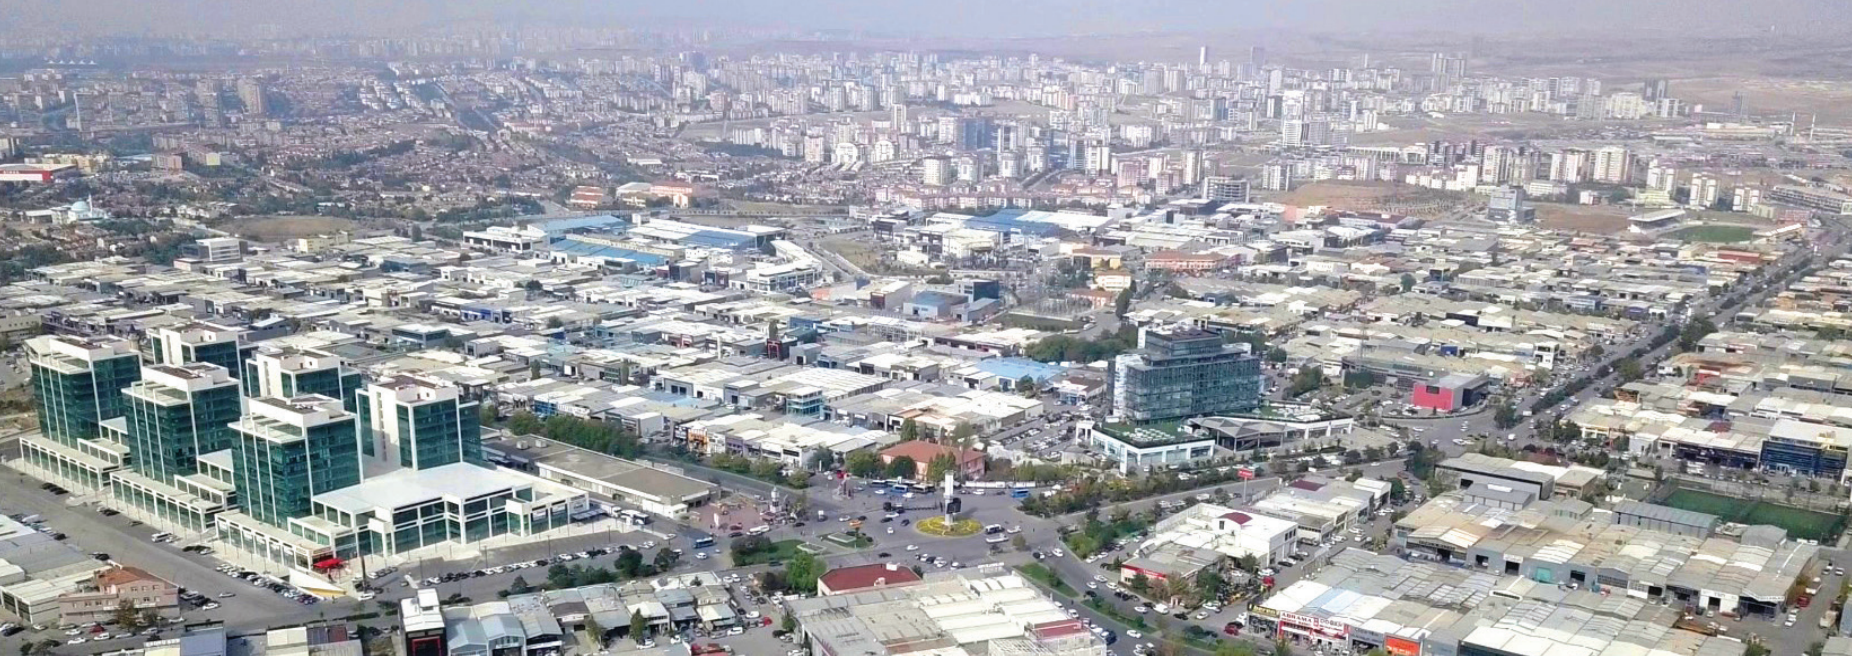

OSTİM Organized Industrial Zone; An industrial city established on an open area of **5 million square meters** in the northwest of **Ankara**, the capital city of **Türkiye**

ABOUT ANKARA

THE CAPITAL OF TECHNOLOGICAL INVESTMENTS

- Ankara ranks second in Türkiye in terms of development.
- It is the second largest city in the production of Gross Domestic Product (GDP) among regions in Türkiye.
- It ranks second in provinces of product manufacturing with advanced technology in Türkiye.
- Ankara, exporting 9,321 billion dollars in 2021, mostly exports to the USA, China, Germany, Iraq and Italy.
- Aviation and space vehicles, basic chemicals, metal construction materials, motor vehicles and engines and non-ferrous metal ores take the lead in the ranking of the sectors to which it mostly exports.
- It takes place near the top in high technology sectors such as machinery and equipment, defense, aviation, medical, precision and optical instruments and electrical machinery in Türkiye.
- Ankara, the capital, is the center of education, R&D, P&D, innovation and qualified production with 12 organized industrial zones, 21 universities, more than 130 R&D centers and 9 techno.

ABOUT OSTİM

TO GLOBAL COMPETITION WITH COOPERATION AND COLLABORATION

OSTİM, after half a century as one of Ankara's leading industrial zones, is an SME city with more than 6,500 businesses and more than 65,000 employees in 17 sectors and 139 business lines, with an international brand value as a solution center for meeting national needs.

OSTİM, whose foundations were laid in 1967 by the late Cevat Dünder and a group of entrepreneurs, taught the concepts of "cooperation", "collaboration" and "coopetition" in Türkiye by expanding the goals of SMEs.

OSTİM strengthened the quality and low-cost infrastructure, input and superstructure production ecosystem towards the problems and needs of the regional enterprises by obtaining OIZ status in 1997. You can access all services such as investments, permits, infrastructure procurement you need in the production environment "in one step" and get them quickly and with high quality in OSTİM.

You may take part in a safe and efficient production environment in this large structure alive for 24/7 showing its difference with production facilities, public service units, living spaces, health, education and non-governmental institutions.

You can get support and cooperation in areas such as training, consultancy, employment, guidance, R&D, technology transfer, marketing, promotion from specialized OSTİM institutions for your needs for the development of businesses.

Strategic sectors were supported with various models in order to increase the competitiveness of the regional businesses, the production and design capabilities in the region were developed and specialization in the fields of defense, aviation, rail systems, medical, engineering and construction machinery, communication technologies, energy and rubber technologies were ensured. Our enterprises, having high design and production capabilities, conduct large-scale works by using the infrastructure and equipment of many business lines in the region.

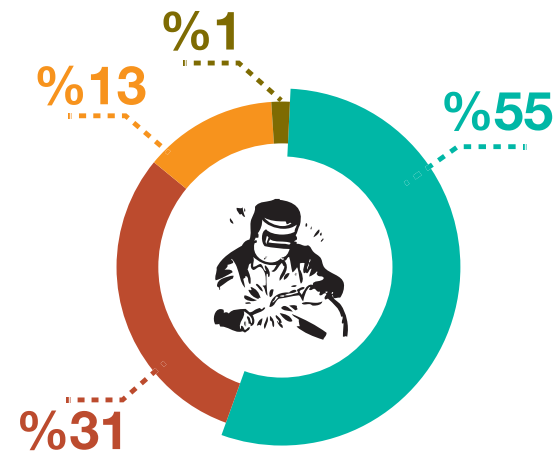

The cluster under 7 different headings in these strategic sectors in the region also provides the opportunity to cooperate with the national production capabilities of the region, especially with the all of the Ankara industry. Clusters, becoming a focus of knowledge and experience within the sector they operate, provide the most efficient communication and interaction environment for the development of innovative products and projects.

OSTİM, with its production experience and ability, provides service to the competitive power of the country's industry, as being an international example and source of inspiration with its integrative, innovative and sustainable works.

ORGANIZED INDUSTRIAL REGION

OUR VISION

To be a sustainable, global and pioneering industrial zone providing services beyond expectations, that first comes to mind in production and supply, directing the Turkish industry with domestic/national/competitive solutions.

OUR MISSION

To be an industrial zone providing quality, innovative and uninterrupted services in a sustainable way, producing projects to make our members and region more competitive and contributing to the development of the Turkish industry.

OUR GOALS

- To develop infrastructure services with renewal and innovative services.
- To diversify member services in strategic sectors and ensure sustainable growth of members with innovative services through long-term cooperation.
- To increase the competitiveness of the Turkish industry with international collaborations, activities and innovative new products/services.
- To ensure the health, safety and security of our employees and all people interacting with our institution by creating ergonomic and safe working environments within the framework of current legislation.
- To carry out necessary activities on energy efficiency with preventing environmental pollution in addition to compliance with environmental legislation and adopting and expanding environmental awareness.
- To increase our service quality within the framework of the understanding of customer satisfaction-oriented and continuous improvement.

OSTİM ORGANIZED INDUSTRIAL ZONE REGIONAL DIRECTORATE

OSTİM OIZ, operating within the framework of Organized Industrial Zones Regulation, provides services its members with the understanding of “One Stop Office”.

OSTİM OIZ, offering strong infrastructure, cheap and high-quality energy opportunities for the businesses in the region from a professional perspective, carries out important projects with the aim of being a competitive and sustainable industrial zone.

Republic of Türkiye OSTİM OIZ, continuing its activities under the Ministry of Industry and Technology, consists of 7 small industrial site cooperatives and the industrial structuring around these cooperatives.

OSTİM OIZ has a visionary management model towards quality and excellence with development and supporting services for the superstructure and development moves it has developed together with solution partners in addition to basic input and infrastructure services.

OSTİM OIZ, adopting the concepts of “quality, innovative, uninterrupted and sustainable” and seen as an exemplary model in many countries of the world, constantly evaluates its service quality.

OSTİM OIZ takes firm steps towards becoming a sustainable, global and leading industrial zone guiding the Turkish industry with domestic/national/competitive solutions coming to mind first in production and supply by providing services beyond expectations.

OSTİM INDUSTRIAL INVESTMENTS AND MANAGEMENT INC.

OSTİM Industrial Investments and Management Inc. (OSTİM Endüstriyel Yatırımlar ve İşletme A.Ş.) establishes project partnerships with SMEs in OSTİM at home and abroad and integrates the engineering, design and manufacturing power of OSTİM into the market with a systematic approach, with the professional support it offers to projects.

The company, combining the wealth and power of OSTİM's projects with its own corporate approach and flexible working approach, operates through corporate relations it has established in local, national and foreign markets, from projects with a mission such as the localization of imported products project based on turnkey facility building.

The company, having experience in system integration, shares its experience and vision with institutions such as public and private sector organizations and universities in the projects of establishing industrial zones in neighboring and friendly countries.

The company also operates the real estates in OSTİM, consisting of business, manufacturing, trade and service centers.

Ostim Industrial Investments and Management Inc. exports the spare parts of heavy construction machinery supplied from OSTİM manufacturers to many countries with its own brand (OSP-OSTİM Spare Parts) and its own logistics power. Thus, the products produced in OSTİM are exported to domestic and international markets with professional employees within the company and involved in both the operation and marketing stages of foreign trade. With exports to many countries over the world, the number of countries where direct invoices are issued has reached 53.

The sector grouping of the company whose shares are traded in Borsa İstanbul is defined as 'Holding and Investment Companies'. The affiliates and subsidiaries of the company operating in different sectors are as follows: Meksis Mechanical Systems Inc., Günhan OSTİM Aluminum Injection Inc., OSTİM Mold Investment Industry Inc., OSTİM Real Estate Consultancy and Management Inc. and Kızılcahamam Akasya Investment Construction Inc.

OSTİM TECHNICAL UNIVERSITY

THIRD GENERATION, INNOVATIVE, ENTREPRENEURIAL UNIVERSITY MODEL

Entrepreneurial individuals who design, produce and solve problems
'everything starts here'.

UNIVERSITY OF INDUSTRIAL WORLD

OSTİM Technical University is a third generation, innovative and entrepreneurial higher education institution, established with the vision of becoming the 'University of the Industrial World'. Established in the center of the OSTİM Organized Industrial Zone, OSTİM Technical University aims to educate qualified, equipped, experienced, designing, producing and asking questions entrepreneurial graduates that the industry needs, with the 'Competency-Based Education Model' shaped in accordance with the 'Experienced Graduate' approach.

EXPERIENCED GRADUATE

Students receiving theoretical knowledge during the education period are provided with the ability to transfer their knowledge to practice, to learn working in harmony with business personnel, and to follow the technological developments in their professional field with business applications.

Students spend the last period of their education at their workplaces with an applied education model aiming to present creative ideas and increase production by working with the industry.

COMPETENCY-BASED EDUCATION

OSTİM Technical University offers a talent and competency-based third generation, entrepreneurial, innovative OSTİMTECH education model, in which theoretical knowledge is experienced in education, learning and practice are prioritized, focused on producing original projects and solutions.

COURSES THAT CREATE THE DIFFERENCE

Students are preparing for business life while they are still studying, with courses such as Introduction to University Life, Construction of the Future, Occupational Health and Safety, Entrepreneurship I/Applied Entrepreneurship, Entrepreneurship II/Sectoral Entrepreneurship, Workplace Training, Workplace Practice.

ENTREPRENEURSHIP RECORD CARD

Students trained as 'Engineers and Technicians Exporting Trade Specialists' graduate with an 'Entrepreneurship Record Card' as well as a diploma by gaining an entrepreneurial perspective. A student with an Entrepreneurship Record Card starts his or her business life one step ahead.

GAZİ ÜNİVERSİTESİ TEKNİK BİLİMLER MESLEK YÜKSEKOKULU

The VETEC-Vocational Education and Technology Center that has been allocated to Gazi University by OSTİM within the scope of the protocol signed by OSTİM OIR and Gazi University in 2009, has started its operation.

The Vocational University that has created its education programs through consultation with the OSTİM OIR Directorate and industrialists, has been coming forward as the OSTİM model vocational education with its technical infrastructure and education model aimed towards satisfying the workforce needs of a quickly growing industrial and service sector.

There are 9 different associate degree programs under 6 different departments at Gazi - OSTİM VS aiming to satisfy the qualified human resource needs of enterprises. Educational activities continue in Electric Energy Production, Transmission and Distribution, Electronic Technology, Mechatronics, Chemical Technology, Industrial Molding, Welding Technology, Machinery, Polymer Technology and Industrial Product Design programs.

The school bases its educational model on on-the-job learning and enables students to learn via directly working on subjects related to their field. Students graduate after taking the vocational training course for one semester. Thanks to the vocational training, students learn the organizational structure of the businesses, teamwork, R&D and innovation concepts, design, manufacturing and quality control processes by direct experience.

Gazi - OSTİM VS is supported by the Council of Higher Education (CHE) within the scope of the Qualified Manpower to Industry from Higher Education Project. With this support, the laboratory infrastructure is constantly kept up-to-date, industry cooperation projects involving students become realized, and certificate trainings and technical trips for students in line with the sector's needs take place.

The Vocational School is in close cooperation with OSTİM businesses. These cooperative efforts continue to increase every day with bilateral protocols being signed. Thanks to these protocols, students take vocational training courses in enterprises, projects with university-industry partnerships are carried out, and almost all of the graduates are employed in OSTİM businesses.

OSTİM TECHNOPARK INC.

Ostim Technopark was established in the OSTİM Organized Industrial Zone and started its operation in 2018. By the end of 2022, Ostim Technopark has partnered with 7 universities and currently operates in 3 buildings, namely the Turkuaz (Turquoise), Turuncu (Orange), and Bronz (Bronze), on 18,450 m² of land from a total of 18,777 m² leasable area and operates with 189 companies.

Prota TMW is a workshop located in the Ostim Teknopark Turuncu (orange) building with a total area of 1600m² (1000m² of workshop and 600m² of offices) and a machine parkour ground that will provide services such as prototype production for existing or planned technology-based manufacturing companies which were first located in OSTİM. In addition, various services such as design and product development activities without the need for the purchase of machinery, training and events for developing technologies, and mentoring, are also offered in the Prota Technology Manufacturing Center. Prota has almost more than 30 pieces of machinery such as: CNC 5-Axis Milling Machine, CNC Turn-Mill Machine, Metal 3D Printer (DMLS Machine), Plastic 3D Printer (SLS Machine), Robot with End Effectors, Laser, and Welding Set, CNC Wire EDM, CNC Fiber Laser, CNC Press Brake, Laser Engraver, CMM-Coordinate Measuring Machine etc.

The INNO:14 Acceleration Center, which started its operations in Ostim Technopark Turkuaz Building in December of 2021, creates a different synergy environment with its strong network and open innovation culture formed by the gathering of many entrepreneurial members from different sectors. INNO:14 Acceleration Center organizes monthly informative events to help entrepreneurs scale up with current trends.

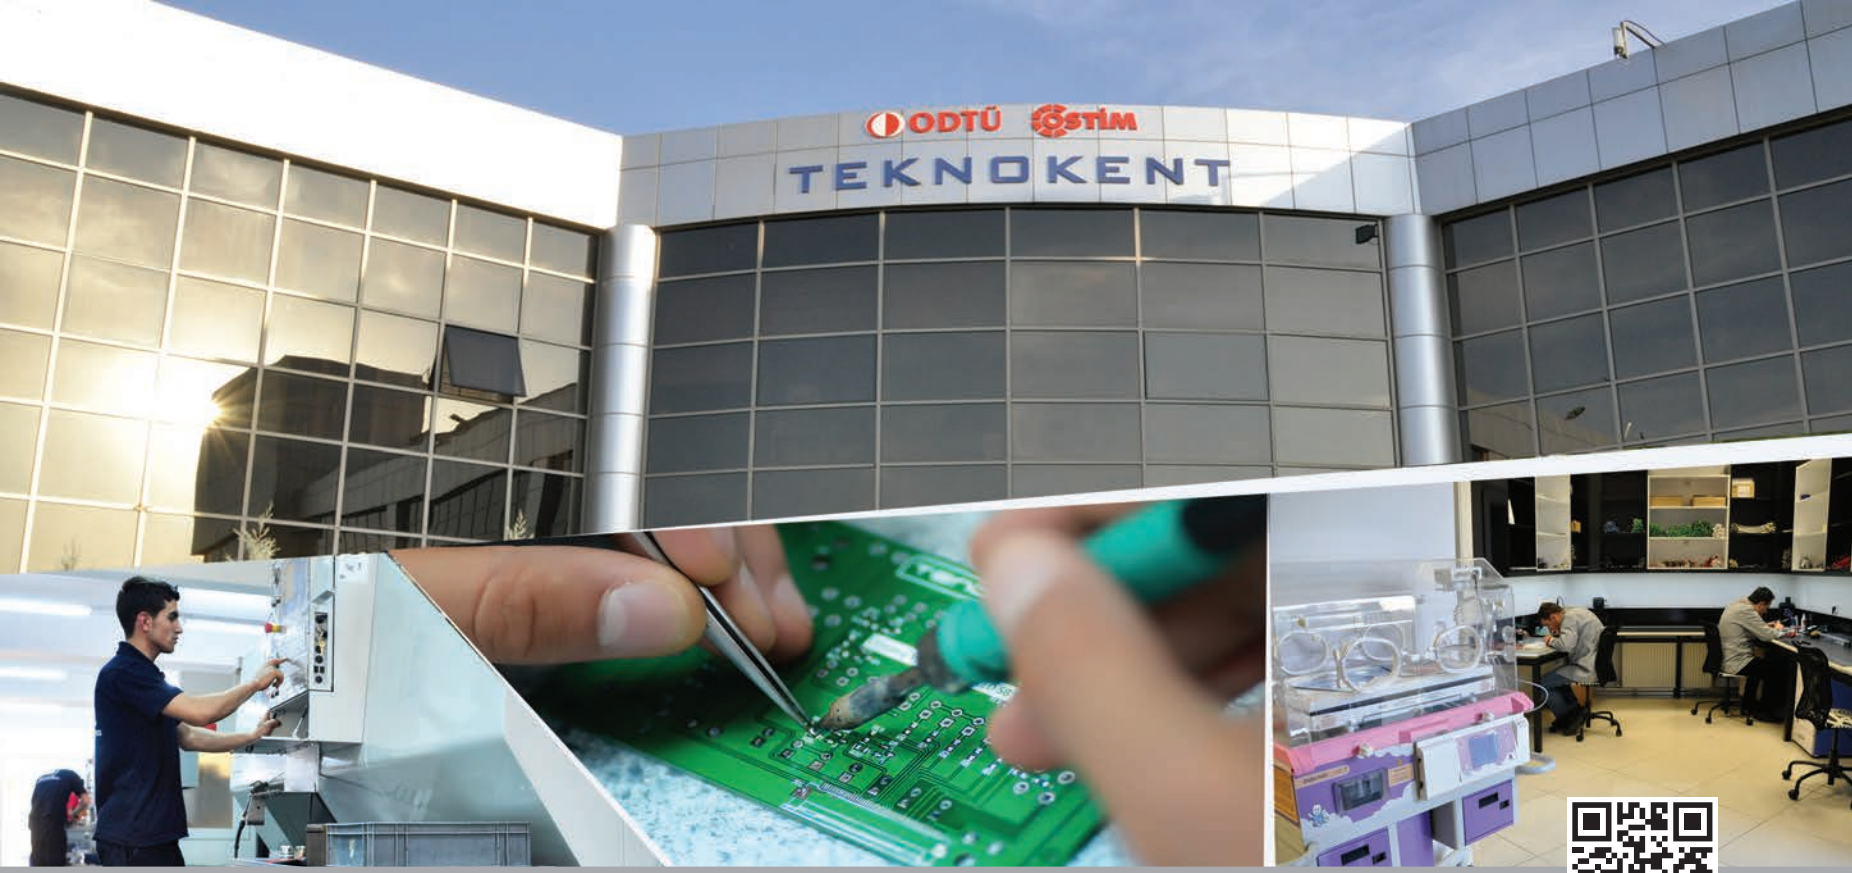

According to the Technology Development Zone Implementation Regulation which is published in February 2022, Technopark Management Companies were approved to operate off-site incubation centers. As Ostim Technopark, the Ministry's approval was received on 22.11.2022 for our application for an OFİM off-site incubation center with an area of 1090 m². Hence, our incubation center has become one of the first 4 off-site incubation centers in Turkey. Ostim Technopark will continue to contribute to the ecosystem by continuing to support entrepreneurs at the OFİM Incubation Center.

After completing the creation efforts, OSTİM Technopark will begin membership registrations to the OSTİM Angel Investment Network.

In addition, Ostim Technopark has been ranked in first place under the "Early Stage Technology Development Zones" category according to the results of the Performance Index 2021, organized by the Ministry of Industry and Technology, in which R&D and Design Centers and Technology Development Zones are evaluated.

Ostim Technopark will continue to contribute to the growth of entrepreneurs by supporting innovative ideas in line with the developments in 2022 and the activities targeted for 2023.

METU OSTİM TECHNOCITY

METU OSTİM Technocity has undertaken the task of fulfilling all the requirements of companies in R&D, software and design works by combining OSTİM's industry-leading experience with METU's technocity experience since 2006.

It is aimed to make our country a world-class innovation center by providing a clustering environment in which the institution, entrepreneurs and companies develop.

While the follow-up of the latest academic developments is ensured with the active contributions of METU lecturers, all new developments in the field of industry are collected under the same roof in this structure, thus providing significant added value to our country at the same time.

Infrastructure opportunities can be provided to all companies working in different fields such as electronics and machinery from the laboratory needs of companies engaged in R&D studies in the health sector in the technology development zone, which provides services in different sectors with more than 45 selected private companies.

OSTİM RADIO

OSTİM Radio, closely following news and cultural-art developments related to urban life in Ankara, where it started broadcasting, presents popular pieces of Turkish folk music to its listeners on the 96.0 frequency and on its website.

OSTİM Radio, receiving great acclaim with its slogan “Radio making the folk songs alive” and bringing together beautiful programs with its listeners, supports cultural and artistic works for OSTİM employers and employees and continues to be the voice of production.

OSTİMSPOR

OSTİMSPOR Club, starting its activities in 1986, was established with the aim of ensuring that the industrial spirit is represented in the sports community and contributing to the mental and physical health of the working youth.

Playing an important role in the social activities and promotion of the region, the Club has also become the symbol of OSTİM OIZ's versatility and gentlemanliness.

It aims to reinforce the feelings of friendship, brotherhood and gentlemanliness of the companies and employees of OSTİM and to help them spend their spare time productively with the social cultural activities and organizations it organizes within OSTİM.

OSTİM Medikal Sanayi Kümelenmesi

OSTİM RENEWABLE ENERGY AND ENVIRONMENTAL TECHNOLOGY CLUSTER

It was established to meet the needs of renewable energy, environment and the related sectors with domestic resources and to increase its market share with continuous innovation and sustainable export vision, and also to become one of the leading innovation and production centers particularly in the Middle East, Africa and Asia. The cluster has been playing an accelerating and facilitating role on developing competition, cooperation and collaboration by bringing together companies, public institutions, universities, non-governmental organizations, national and international platforms in the renewable energy and environmental technologies value chain, since its foundation.

OSTİM ENERJİK closely monitors the energy goals and policies of our country for its members operating in renewable energy and environmental technologies. It grows by increasing its domestic and national production claims on meeting the needs.

ANATOLIAN RAIL TRANSPORTATION SYSTEMS CLUSTER (ARUS)

Starting with the principle of 'Cooperation, Collaboration and National Brand in Turkish Railway Sector', ARUS is Türkiye's first non-regional cluster covering all of Anatolia. ARUS, aiming to make it a world brand by producing domestic and national brand rail transportation systems in our country, from its design to the final product, produces national brands by bringing together its members and the leading organizations of the sector.

ARUS, by signing more than 10 national brands in the production of not only rolling stocks but also signalization, electrification, infrastructure and superstructure since the day of foundation, has provided more than 220 national vehicles into service in İstanbul, Bursa, Kayseri, Kocaeli, Samsun, Antalya, İzmir and Gaziantep.

ARUS, achieving international success, is a member of the European Railway Clusters Initiative (ERCI) and has the International Bronze Cluster Management Excellence Certificate. ARUS, together with 2 European Union COSME projects, has successfully carried out The Ministry of Trade-International Competitiveness Development project.

OSTİM RUBBER TECHNOLOGY CLUSTER

It consists of companies in the value chain of the rubber industry. The close gap in export and import ratio of the sector, 100% foreign-dependent for raw materials, states that it is a competitive sector.

Becoming a member in the cluster, continuing on its way with the motto of 'domestic production and value-added product', is possible from all cities of Anatolia, especially Ankara and surrounding provinces. Among the cluster members, there are companies from Bursa, Sakarya and Istanbul along with Ankara.

The main activities of the cluster since its establishment are as follows: R&D Projects, the establishment of the European Rubber Clusters Association, Ankara Development Agency Rubber Recycling Feasibility Project and 3 state-funded projects.

COMMUNICATION TECHNOLOGY CLUSTER

The Communication Technology Cluster has brought together domestic and national companies operating in the field of communication technologies.

The cluster was established to increase their competitiveness with industry-university-public cooperation and to meet the needs of our country, to act jointly with stakeholders in the communication technology sector in order to cooperate and collaborate to create international brands, to reinforce and develop domestic and national development in the field of economy and industry, to meet the needs of the sector and to ensure that its members can compete in international markets, to commercialize the knowledge developed by universities in this regard, to meet the needs of businesses providing services with hardware, software and infrastructure manufacturers in the sector.

With the End to End Domestic and National 5G Communication Network Project, an end-to-end commercial 5G network sold in Türkiye and world markets and meet the needs of mobile operators.

Phase 1 has been completed and Phase 2 studies are continuing. After the works, Türkiye will be able to use the domestic and national 5G Communication network simultaneously with the world.

OSTİM DIGITAL TRANSFORMATION OFFICE

OSTİM established the Digital Transformation Office in order to encourage the digital development of its member companies, to facilitate the transition to the digital production model, and to support companies in their digital transformation processes. In the digitalization process, we give support for the coordination of the digital transformation applications of the manufacturers in the regional ecosystem and the determination of the company-specific roadmap.

The Digital Transformation Office, which took its place among the service units of OSTİM Organized Industrial Zone in January 2022, will carry out studies with OSTİM members to raise awareness of digital transformation in production, to encourage the digital development of member companies and to facilitate their transition to a digital and smart production model.
