## UNITES ACADEMY AND INDUSTRY

To support and develop the synergy between the academic knowledge of universities and the companies, to direct it to proper channels. To increase the cooperation through clusters and provide academy-industry cooperation.

## ADDS VALUE TO PRODUCER AND THE PRODUCT

Developing R&D and innovation eco system in the areas of medium and high technologies, high technologies. Commercialize the developed technologies, expand the production and export capacity.

## SUPPORTS THE IDEA TO PROTOTYPE AND THE FIRST STAGE MANUFACTURE

To support the young entrepreneurs and encourage them to produce, To establish new industrial production infrastructure and organizational models and align them with global developments.

## WE ARE PARTNERS OF THE WORLD'S CLEAN FUTURE

Being the focus of R&D, design, software and innovation activities, within clean technology priority.

# PROTA

T.C. Proje Akademi D.İ.İ.İ. ve T.C. Türkiye Cumhuriyeti  
Bilimsel Araştırma Bakanlığı

Ostim Teknopark Teknoloji Üretim Atölyesi

ROTA Technology Production Workshop, located in the Turuncu Building, offers a 1000 m<sup>2</sup> workshop and 900 m<sup>2</sup> office space.

- It aims to create a culture of production through applied research, open innovation, rapid prototyping, and prototype production, along with technical/theoretical training, consultancy services, and mentoring support for entrepreneurs/companies.
- PROTA, which has a membership system, is designed to assist early-stage entrepreneurs and manufacturers in transitioning from prototype to product and expanding into sustainable businesses and domestic/international markets by providing them with access to the right resources, mentorship, and the manufacturing industry.
- The PROTA Technology Production Workshop community will consist of entrepreneurs, manufacturers, investors, mentors, engineers, designers, and academia and industry members.
- The diversity of infrastructure and perspectives will create opportunities for creative production and collaboration by promoting innovation.
- It will have a unique production center to make the product development cycle as efficient and uninterrupted as possible.
- It will provide resources for product design and rapid prototyping, including 3D printing machines, a metal shop, and more.
- Strong and efficient events, training, workshop, seminar, and other programs will be available for members of the PROTA Technology Production Workshop.
- Our expert consultants have years of experience in business, manufacturing, mechanical engineering, and design services to transform new product ideas into scalable businesses.
- Design consultants, technicians, and other staff will be there to answer your questions.
